Subject: Grandstand destruction

It is apparent that the concerns of the county residents have zero impact on your decisions. The Grandstands are not yours to destroy, merely because you want to see something else in its place. Your lies, concerning the cost to repair what we now have, should be criminal. Your constant reliance on the extremely over-inflated tag is very deceiving, and you all know it. Making decisions based on the assumption that taxpayers are not savvy enough to see reality is folly. To say that you are making a financially sound decision is laughable, as you don't even know the value of what you destroy. To make this even more ridiculous, you destroy valuable and much-loved property without knowing whether this is what the public wants, or if they will even vote to pay for your wreckless waste. Hubris does not begin to describe your actions. To make yourselves even more tone-deaf, you three will not even be bothered to answer emails from concerned citizens . . . not even a form letter. Because of your pompous disregard for the public, disdain for the Commission is growing daily, and thousands of residents are disgusted by you, and despise the sight of you. So go fuck yourself. Enjoy the ride on your temporary high horse. Sit on the saddle horn.

If you don't like my words, tough shit.
